Expert Knowledge Elicitations in a Procurement Card Context:

Towards Continuous Monitoring and Assurance

Presented by: Deniz Appelbaum Abdullah Al-Awadhi INTRODUCTION: P-Card Fraud Risk and Project Story

- Why do P-cards create higher fraud risk than employee credit cards?
 - P-card owners have a <u>higher volume</u> of transactions on a <u>normal</u> basis, while employee credit card usage is typically limited to a periodic event or business trip.
 - For P-card transactions, no pre-approval is required, while employee credit card transactions may require formal manager approval before the credit card provider is reimbursed.
 - Transaction amounts are higher due to type of goods/services purchased, which may increase the <u>rationalization</u> to commit fraud, even in small amounts.
 - Difficulty to detect misuse increases <u>opportunity</u>, which, together with rationalization, constitute two out of three fraud triangle components.
- Previous software audit tools were found not effective, and the firm's procurement card fraud expert, Lisa, is manually reviewing transactional data every month
- Large international consumer goods manufacturer with many diverse products and divisions. P-cards mainly used for MRO and research purposes.

2 Phases of the project:

- Build an expert system (an "electronic Lisa")
- Improve anomaly detection rate in p-card data

Introduction: Project Story

Measure for Jan 2013 to April 2014	Total Data Set	Missing Purchase Item Information Data Set
# of Transactions	741,710	194,528 (26% of total)
# of Employee IDs	4532 (cards are 5600)	4339
Total \$ Fin Original Currency	\$157,115,184	\$65,926,544 (42% of total)
Total # of vendors	101,900	41,258

Methodology: Data Preprocessing and Exploration

RUTGERS

Expert System Decision Tree:

EXPERT TOOL - PASS TESTS and PROFILES of RED FLAGS

Month and year of pass test	Red Flags Produced by Expert Tool	Red Flags Produced by Auditor	Effectiveness
1) 6/13	1408	957	68%
2) 7/13	1300	1235	95%
3) 10-12/13	2267	2236	98.5%

RUTGERS

P-CARD TOOL

- The tool was also developed in an EXCEL version due to the firm's request.
- The tool has different levels of exceptions, from high false positives to high false negatives
 - The expert will have the ability to decide which level to focus on

RUTGERS

P-CARD TOOL - ILISA

- We added a new feature which includes a visual dashboard of exceptions founds.
- The dashboard provides a quick and efficient way of observing exceptions and noticing any spikes in the visuals.
