</tr>
</tbody>
</table>

- User runs the report daily, weekly, monthly
- User runs the report on demand
- Application automatically runs every 10 seconds (continuous polling)
Database events:
- Add record to table
- Modify record to table
- Delete record from table

Registered 3rd Party Apps:
- Database procedures
- ERP modules
- 3rd party dictionaries
- 3rd party applications

Application submits a request to be notified when certain even triggers occur

</tbody>
</table>

Reportable Condition: Payables transaction not posted to the payables GL control account
This journal entry was created from a transaction that increases or decreases the accounts payable sub-ledger while not effecting the balance in the accounts payable GL control account. Consequently, this journal entry could cause an out-of-balance condition. The general ledger account number subject to the exception is 000-1100-00.

Reportable Condition: Transaction posted to a prior month
This journal entry contains a questionable posting to a prior month and may be subject to reversing or adjusting journal entries prior to the close of the entity’s fiscal year. The general ledger account number subject to the exception is 000-1100-00.
After Market Sales of Luxury Car Sunroofs and T-Tops

November 8 and 9, 2013

Greg Frazier, CPA.CITP – Implementing Continuous Audit Facilities for Small and Medium Businesses

Glaxis EDI Work Orders

FedEx Shipment Tracking

Cloud

Continuous Polling

Tropo.com

Cloud

SMS Text Notifications

SendGrid

HttpRequest

Microsoft Azure

Cloud

Cloud Storage – Bing Mapping Data

Cloud Storage – Claims Query Data

Cloud

FedEx Open Shipments

Notes – Claims Inquiries

1. RAMS server continuously polls MS tables for claims inquiries and FedEx Tracking notification updates.

2. Incoming inquiries and notifications are processed and outbound inquiry responses and notifications are sent back to MS Azure for transmittal to customers.

Notes – Claim Status Notifications

1. MS Azure application continuously polls FedEx Tracking Web Service for shipment status changes per FedEx Tracking number.

2. SMS text and email notifications are sent to customers apprising them of shipment progress and status.

Notes – Real Time ‘Live’ Updates

A,B – Real time updates to FedEx open shipments and vendor tables where COM dll calls Azure Web Service.
Continuous audit facility evaluates AP aging each time a credit transaction is posted to the AP control account.

A,B – Real time updates to FedEx open shipments and vendor tables where COM dll calls Azure Web Service.
Benefits

- Faster detective reports
- Smaller footprint in auditee’s environment
- Less costly than traditional audit approach

Drawbacks

- Limited ability to analyze transactions in aggregate
- High reliance on auditee’s IT environment
- High reliance on 3rd party IT resources
Questions
