# Why Use Structured Disclosures?

- Immediate access to 100% of financial statement disclosures (numeric and narrative)
- Immediately reusable
- Freely available
- Includes all of the meta-data
  - Dimensional insights (e.g. sectors, geography, products)
  - Company specific disclosures
  - Explicit definitions
  - Relationships (e.g. calculations, references, etc.)
- Enables incremental process capabilities

# Standards Enabled Capability Enhancements

- Inline Viewer
  - Navigation
  - Data Quality Filters (extensions, negative values, etc.)
  - Red Lining of changes
  - Disclosure Checklist
  - Time Series Charting
  - Time Series Benchmarking
- Validation, Quality, Risk, Compliance rules
- Aggregation
- Many Others

# Potential Process Enhancements

- All filings; All financial statement disclosures
- Early adoption a particular accounting standard
- Combination of disclosures that may reveal a risk pattern
- Compare disclosure and specific sector risk profiles across targeted filers
- Identification of existence or absence of required disclosures
- Aggregate specific disclosure for a target period/year
- Narrative sentiment alignment with numeric results
- Statistics or trends on a specific financial disclosure such as net deferred tax assets (liabilities) or income tax expense
- Data quality assessment and searching for issues such as incorrect tagging, use of inappropriate extensions, and scaling errors

# Consumers and Investors?

# What is 'structured disclosure'?

- Data about data

- Human readable: Revenue      110,360

- Machine readable:

- <<us-

- gaap:RevenueFromContractWithCustomerExcludingAssessedTax id="F\_000023" contextRef="C\_0000789019\_20170701\_20180630" decimals="-

**Footnote**

NO Investments in Affiliates  
 We regularly transact business with these equity investees. For information regarding our use of the equity method of accounting, see Note 4. Financial statement data for these equity investees is presented below:

	Equity Ownership %
Combined Metals of Chicago, LLC	40.0%
Delaco Processing, LLC	49.0%
Rockport Roll Shop LLC	50.0%
Spartan Steel Coating, LLC	48.0%

Cost of products sold includes \$12.3, \$6.7 and \$11.7 in 2016, 2015 and 2014 for our share of income of equity investees other than Magnation. Our share of loss from Magnation through the first quarter of 2015 is included in other income (expense) and totaled \$16.3 and \$15.2 for 2015 and 2014. No amounts for Magnation are included in our results after March 31, 2015, when the investment was written off. As of December 31, 2016, our carrying cost of our investment in Spartan Steel exceeded our share of the underlying equity in net assets by \$12.3. This difference is being amortized and is included in cost of products sold.

Summarized financial statement data for all investees is presented below. The financial results for the joint ventures acquired with Dearborn—Spartan Steel and Delaco Processing—are only included for the period since the acquisition and the financial results for Magnation are only included through March 31, 2015, since it was unlikely after that date that we would retain our equity interest as a result of Magnation's bankruptcy.

**Tables**

	2016	2015	2014
Revenue	\$ 286.4	\$ 356.4	\$ 386.1
Gross profit	96.3	68.3	93.2
Net income (loss)	31.8	(9.8)	10.8

	2016	2015
Current assets	\$ 94.1	\$ 89.3
Noncurrent assets	66.0	66.9
Current liabilities	14.4	14.5
Noncurrent liabilities	44.8	33.8

We regularly transact business with these equity investees.  
 Transactions with all equity investees, including Magnation, for the years indicated are presented below:

	2016	2015	2014
Sales to equity investees	\$ 69.2	\$ 61.4	\$ 93.4
Purchases from equity investees	213.5	251.0	67.7

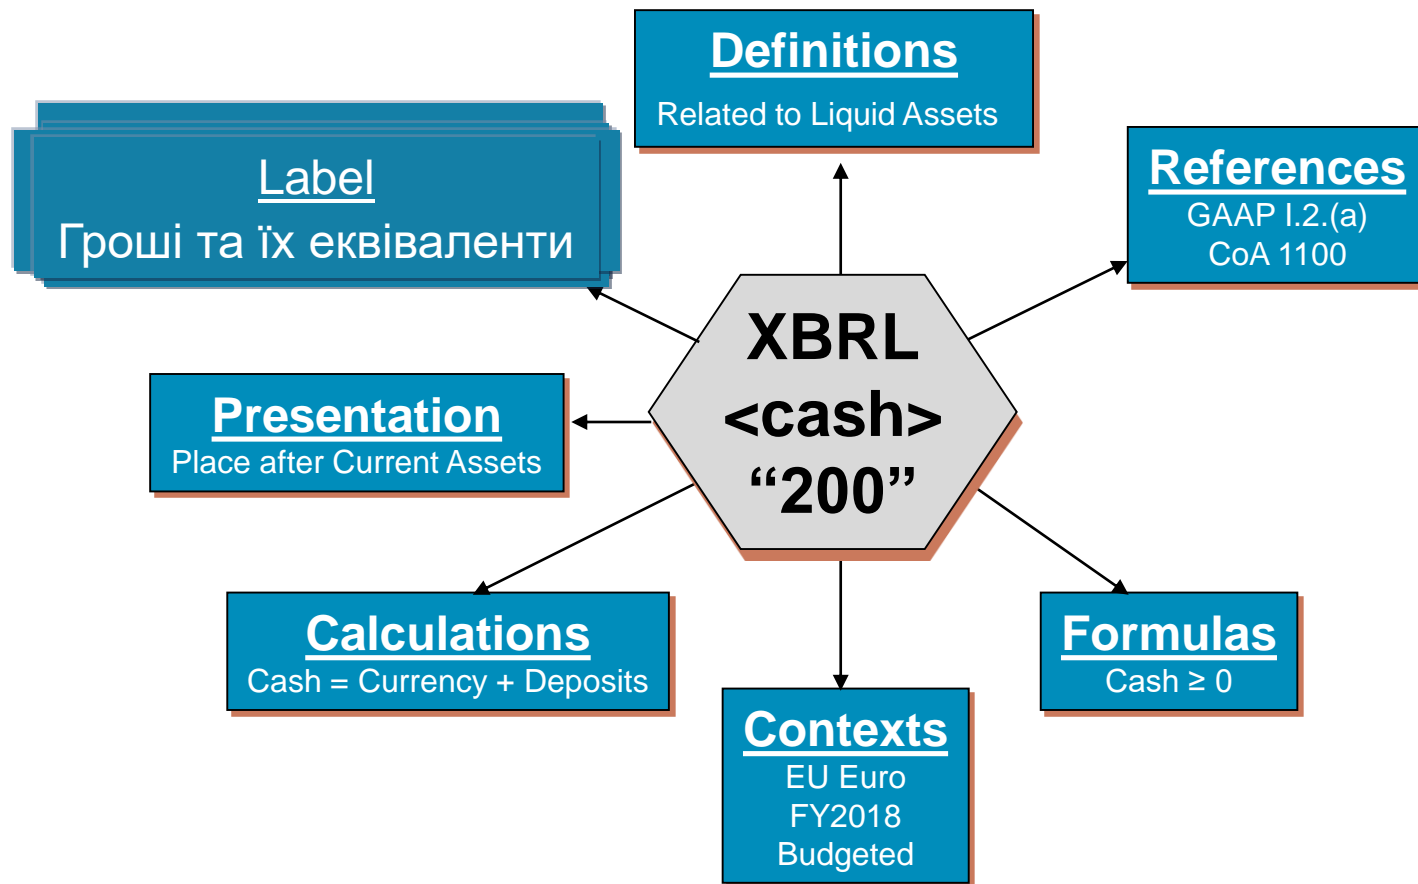

Outstanding receivables and payables with all equity investees as of the end of the year indicated are presented below:

	2016	2015
Accounts receivable from equity investees	\$ 2.6	\$ 0.4
Accounts payable to equity investees	4.1	33.1

**Policies**

Magnation  
 As of March 31, 2015, we determined that our 49.9% equity interest in Magnation was fully impaired and recorded a non-cash impairment charge of \$256.3 for the quarter ended March 31, 2015. Key factors that affected our conclusion that

# What is XBRL?

## Relationships that matter

# Report Quality Matters

- Context Dates – DEI (6 months ended June 30) v Document Period End date (March 31)
- Scaling - Unremitted Foreign Earnings \$B vs. \$M
- Inappropriate extensions - for ‘Total Revenues’ and ‘Other Income’
- Negative values - for a ‘Contingent Liability’
- Incorrect tagging - Tagging Gross Revenue with ‘Discount Rate’ tag
- Duplicate tagging - same data with different tags
- Disclosures not tagged
  
- Staff Observations and Guidance [here](#)

# Report Quality - Analysis

## Quality Example

Aggregated Element: “Defined Benefit Plan, Assumptions Used Calculating Benefit Obligation, Discount Rate”

	2017
Average Discount Rate – As reported	7.7549%

# Report Quality - Aggregation

# Report Quality - Extensions

- Company A element extension
  - Tradeaccountsreceivablenet – with no definition provided
- US GAAP Taxonomy element alternative
  - AccountsReceivableNetCurrent – defined as “Amount due from customers or clients, within one year of the balance sheet date (or the normal operating cycle, whichever is longer), for goods or services (including trade receivables) that have been delivered or sold in the normal course of business, reduced to the estimated net realizable fair value by an allowance established by the entity of the amount it deems uncertain of collection.”

# Why Inline XBRL?

- Single document - structure actual filing rather than a separate exhibit to the filing
- Familiar View – within financial statement browser view to review structured data
- Enhance Review - search and filter filing by keyword or concept (e.g., FASB references)
- Navigate - use Table of Contents to quickly jump to financial statements and footnotes
- Improve Data Quality
  - Assist staff reviews (e.g., identify mislabeled or untagged information)
  - Eliminate the need to reconcile 2 different documents (HTML and XBRL)

# What is Inline XBRL?

Changes in the carrying amount of goodwill for fiscal years 2010 and 2009 by segment (In millions)

# When is Inline XBRL Reporting?

- Adoption of amendments requiring Inline XBRL (<https://www.sec.gov/rules/final/2018/33-10514.pdf>)
- U.S. GAAP filers: 3 year phase-in compliance with requirements as follows, beginning with fiscal periods ending on or after:
  - June 15, 2019 for large accelerated filers
  - June 15, 2020 for accelerated filers
  - June 15, 2021 for all other filers
- Filers no longer required to post their XBRL formatted reports on their individual company web sites as of September 17, 2018.
- Updated FAQs (<https://www.sec.gov/structureddata/osd-inline-xbrl.html>)
- Inline Instructional Video ([https://www.sec.gov/structureddata/osd-inline-xbrl.html#XBRL\\_Video](https://www.sec.gov/structureddata/osd-inline-xbrl.html#XBRL_Video))
- RSS Feed (<https://www.sec.gov/Archives/edgar/xbrl-inline.rss.xml>)

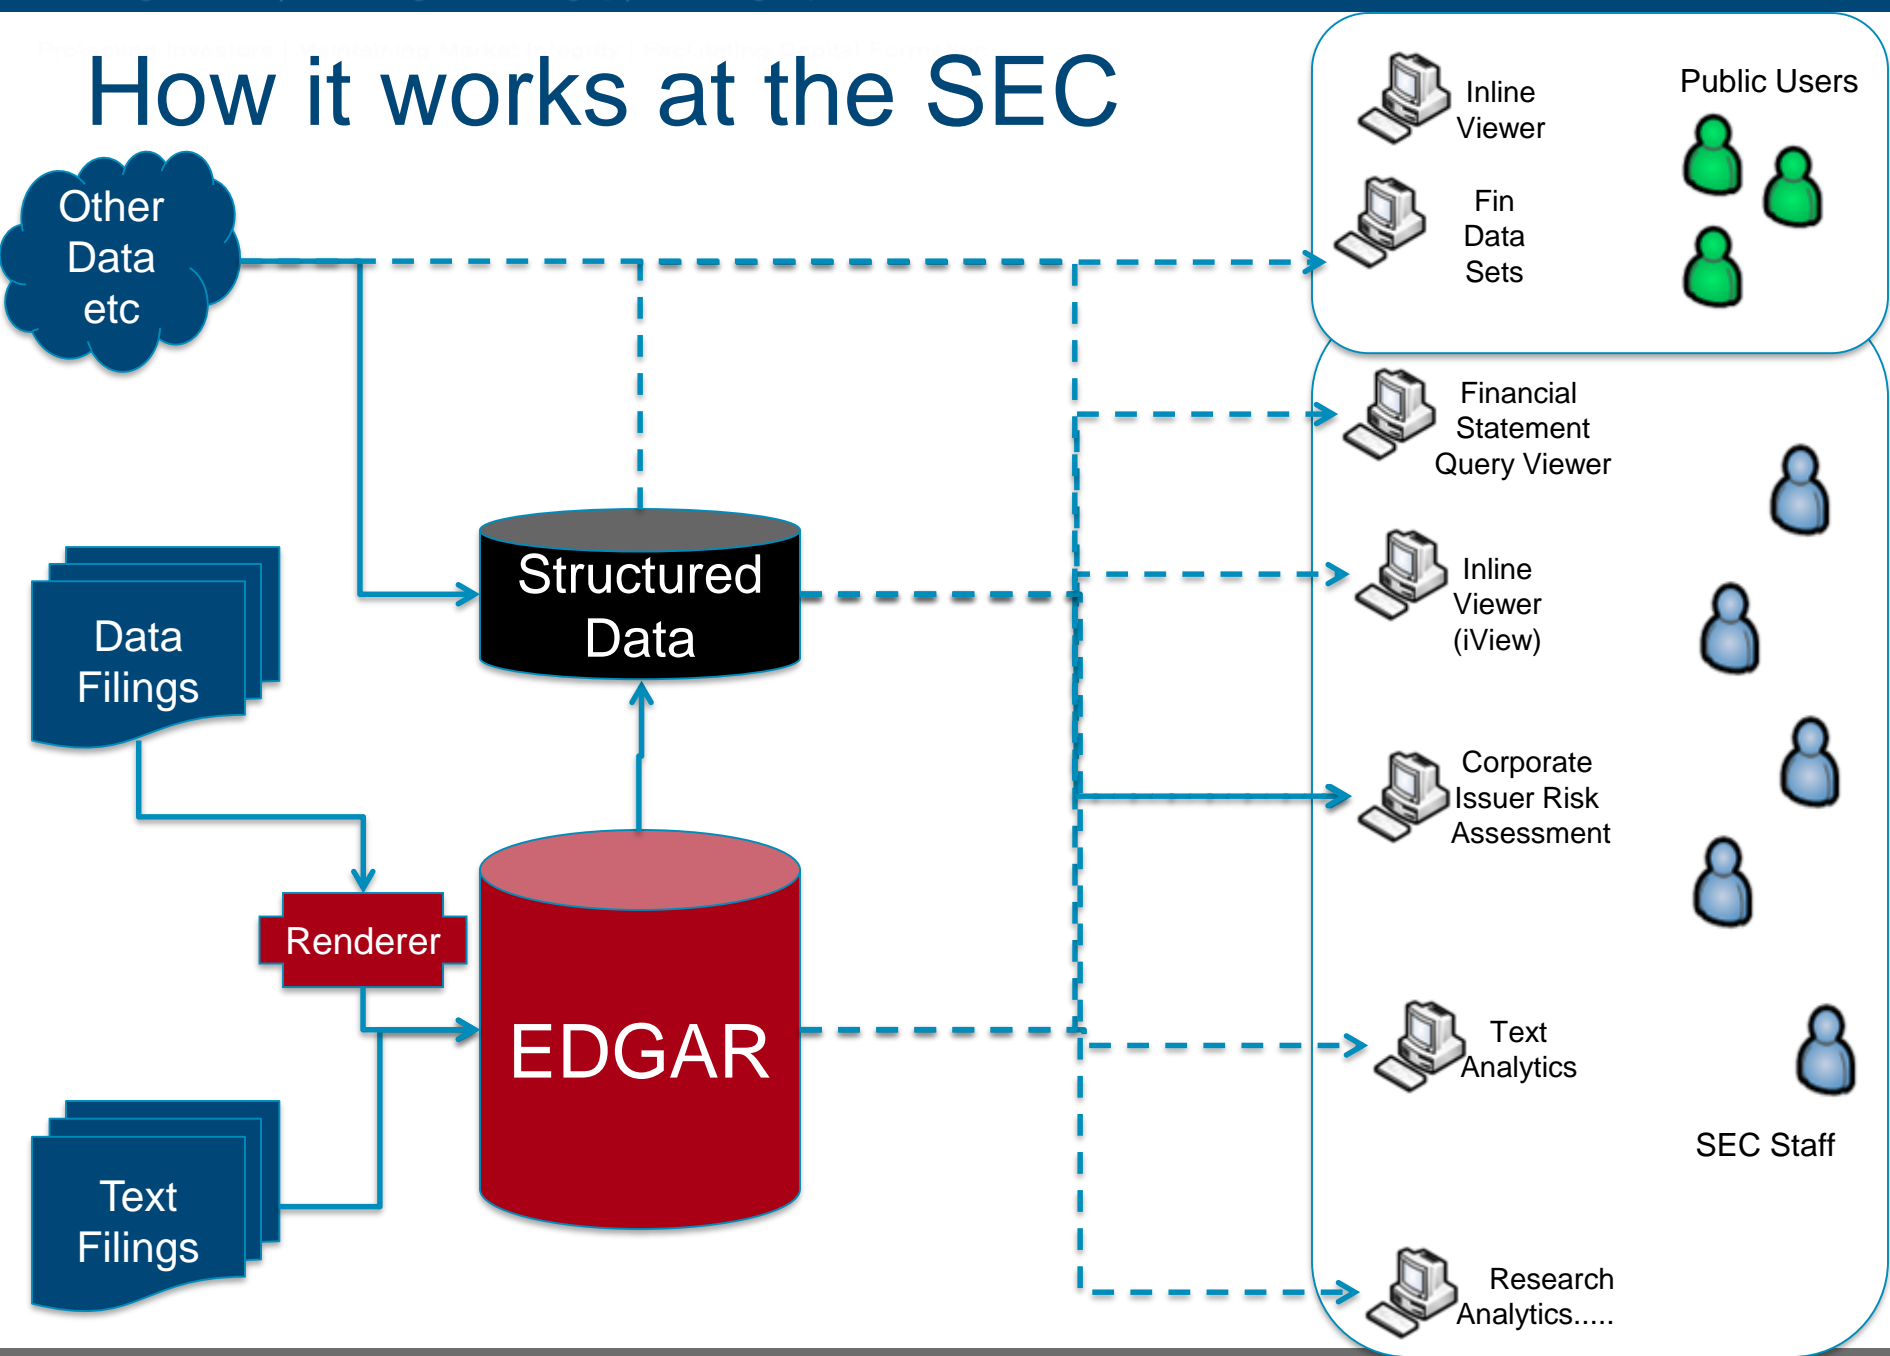

# Inline XBRL Viewer Video

- <https://www.sec.gov/structureddata/osd-inline-xbrl.html>

**INLINE  
XBRL**

# How it works at the SEC

# Corporate Issuer Risk Assessment (CIRA)

- **Analytical tool:** provides detailed information on various aspects of a company's business activities and financial reporting environment
- **Dashboard:** enables the user to search, compare and analyze a variety of information about companies through a single intuitive visual interface
- **Identify patterns:** Helps users assess the risks associated with financial reporting with more than 200 variables for thousands of SEC registrants across multiple years
- **Approach:** Based on database approaches used by academic financial accountants and large sample evidence documented in academic literature
- **Data sources:** Uses a variety of structured data.

# Financial Statement Query Viewer (FSQV)

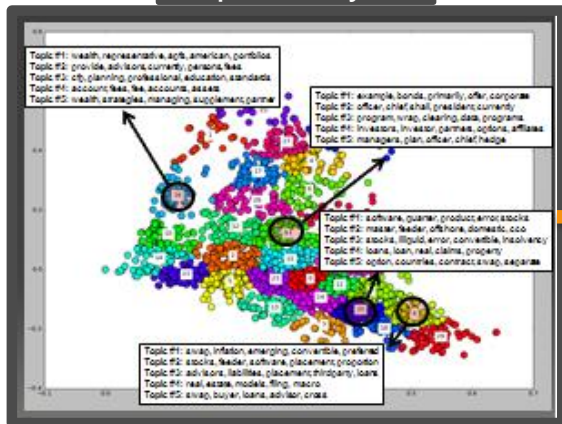

- Intuitive, quick and easy-to-use web browser interface.
- Search and review filings and **all** facts across **all** filers in ways not previously possible.
- Potential staff uses include:
  - Search using various criteria (e.g., CIK, ticker, industry, filer status, country).
  - Search by Fact (e.g. specific disclosure type and/or specific taxonomy element)
  - Search by Text (e.g. any text within a narrative disclosure)
  - Compare footnote narrative text differences between periods (e.g. 'red-line' changes).
  - Save all results and searches locally for further analysis and reuse.

# iView

- Leverages the open source freely available publicly available Inline XBRL Viewer
- Includes all public filters and query capabilities
- Offers time series charting for numeric values
- Offers benchmarking charting for numeric values
- Provides interface for contextual delivery of compliance, risk, liquidity, etc. models
- Proxy for an ‘augmented reality’ platform for report analysis.

# Machine Learning Process

Topic Analysis

Tonality Analysis

Machine learning allows us to map signals in text to outcomes of interest

Machine Learning

Targets

# Academic Research Paper

## The Impact of Information Processing Costs on Firm Disclosure Choice: Evidence from the XBRL Mandate

**Abstract:** “This paper examines the effect of market participants’ information processing costs on firms’ disclosure choice. Using the recent eXtensible Business Reporting Language (XBRL) regulation, I find that firms increase their quantitative footnote disclosures upon implementation of XBRL detailed tagging requirements designed to reduce information users’ processing costs. These results hold in a difference-in-difference design using matched non-adopting firms as controls, as well as two additional identification strategies. Examination of the disclosure increase by footnote type suggests that both regulatory and non-regulatory market participants play a role in monitoring firm disclosures. Overall, these findings suggest that the processing costs of market participants can be significant enough to impact firms’ disclosure decisions.”

[https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=3315561](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3315561)

# Academic Research Paper

## Effects of Information Processing Costs on Price Informativeness: Evidence from XBRL Mandate

**Abstract:** “Using the Securities and Exchange Commission’s eXtensible Business Reporting Language (XBRL) mandate as a pseudo-natural experiment, we identify a causal link between information processing costs and stock price informativeness. We find prices have become more informative after the XBRL mandate, and such effect is upward-trending over the first three years post adoption, which indicates a learning curve for firms and investors. Examining the tagging process reveals that detailed tagging contributes to improved price informativeness, whereas block tagging has no impact. Further, firms with relatively shorter trading age have more benefit from XBRL adoption than older firms, supporting the conjecture that XBRL accelerates the information incorporation process and facilitates the market to learn about younger firms faster.”

[https://papers.ssrn.com/sol3/papers.cfm?abstract\\_id=3324198](https://papers.ssrn.com/sol3/papers.cfm?abstract_id=3324198)
