

58th World Continuous Auditing & Reporting Symposium

November 3 & 4, 2023

ACCOUNTING IN THE ERA OF AI GENERATIVE AI, LARGE LANGUAGE MODELS, AND SOCIAL RESPONSIBILITY

The **58th World Continuous Auditing & Reporting Symposium** (58 WCARS) is the leading global forum on the application of technology to accounting, auditing and financial reporting. The aim of the conference is to provide a forum for all stakeholders, including accounting customers, regulators, the Big-4 and regional accounting firms, internal auditors, and technology vendors to share experiences, best practices, and emerging technologies.

This year's conference will focus on the role of artificial intelligence, such as ChatGPT, in accounting and auditing, as well as on the upcoming ESG mandates. The keynote speaker will be PCAOB board member Christina Ho. Other speakers come from the SEC, the UK FRC, the Big-4, and leading academics.

The conference attracts a large audience, with most participants coming from the internal audit departments of leading businesses and governmental organizations, as well as from the vendor community.

Please contact Dr. Michael Alles at alles@business.rutgers.edu for further information. Details of the 58 WCARS can be found on the conference website: <https://raw.rutgers.edu/58wcars.html>. Registration is now open.
