

# Using a Big CA(A)T to Tame the Big Data Jungle

---

Cathy Blunt  
Manager Internal Audit Griffith University

Mario Bojilov  
Meta Business Systems Pty Ltd

Thursday 21<sup>st</sup> November  
World Continuous Auditing & Reporting Symposium

## Introduction

---

- About Griffith University and MBS
- Building the Brief and Resourcing the Project
- Selling the Concept
- The Challenge of Getting the Data
- Practical Learnings from Implementation
- Seeing the Results

# Introducing – Griffith University

---

- 5 Campuses – South Bank, Nathan, Mt Gravatt, Logan and Gold Coast
- 43,000 Students – Business, Arts Education & Law, Science Engineering Environment & Technology, Health
- 300 Degree Programs
- Growth from 2000 to 2010:
  - Operating Revenue 156%
  - Net Assets 173%

# Partnering the Implementation

---

## Meta Business Systems

Our focus is on:

- Strategic and operational reporting and analysis
- Continuous Business Process Improvement and Monitoring
- Full QA on large system transitions

## The Brief

---

- External Quality Assessment recommendation in 2007
- Limited skills and resources in house
- Improved data extraction and analysis
  - Access to data on our terms
  - PeopleSoft queries difficult to use
  - Lack of access to PeopleSoft Finance System and reports/data
- Planning & Financial Services already interested
- Sell benefits to HR Management

# External Driving Forces

---

- Financial Accountability Act 2009
- Financial & Performance Management Standard 2009
  - Monitoring & assurance over financial systems
- Chief Finance Officer's Certification
  - Replaced systems appraisals
  - Implementation of internal controls
  - On going effectiveness of internal controls
- Queensland Audit Office Report
  - Fraud Risk Management
  - Data Analytics over Fraud Risks

## The Resources

---

- Salary Savings
- Vendor Quotation
- Software Licensing
- Time for Training
- Unexpected Costs
  - Virtual Server & Support
  - IT Implementation Costs
  - Additional reports
  - Maintenance Costs

## Selling the Concept

---

Getting support and approval

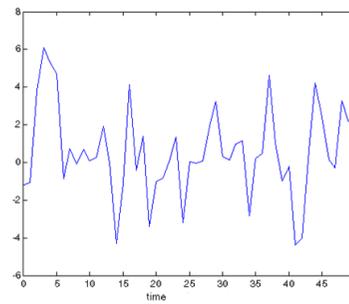

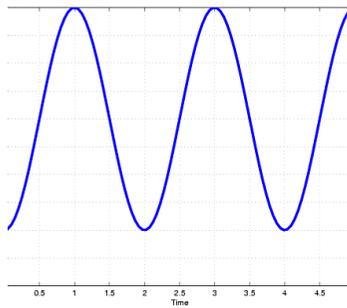

- Pro Vice Chancellor Administration
- System Owners – Finance/HR:
  - You want to do what with **MY** data?
- System Custodians:
  - You want to do **what** with **MY** data and **MY** production system?
- Project proposal and brief from MBS detailing:
  - How the data and systems would be impacted
  - List of proposed reports and reconciliations

# The Concept

---

- Continuous

# The Concept

---

- Continuous
- Large amounts of Data

**TIMELINE OF A CEO'S DEPARTURE**

**June 28**  
Phosphagenics puts its shares into a trading halt.

**July 1**  
Says it has discovered "irregular" invoicing and accounting transactions. Chief executive Esra Ogru (above) is suspended.

**July 22**  
The company announces Dr Ogru has resigned, effective from July 18.

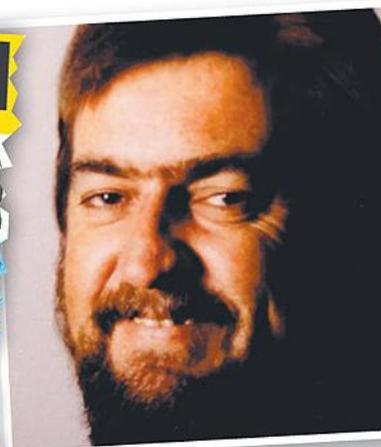

**July 24**  
Phosphagenics says Dr Ogru was dismissed. Forensic investigation finds \$5.7 million has gone missing between 2006 and 2013.

**the Sunday Mail**  
FEBRUARY 18, 2018 \$7 THE SUNDAYMAIL.COM.AU

**EXCLUSIVE: Betrayed wife tells how fraudster hubby stole \$20 million and lived the high life**

*Lifestyle of*  
**THE RICH & HEINOUS**

## The Concept

---

- Continuous
- Large amounts of Data
- Integrated Datasets

## The Concept

---

- Continuous
- Large amounts of Data
- Integrated Datasets
- Protecting the Source System

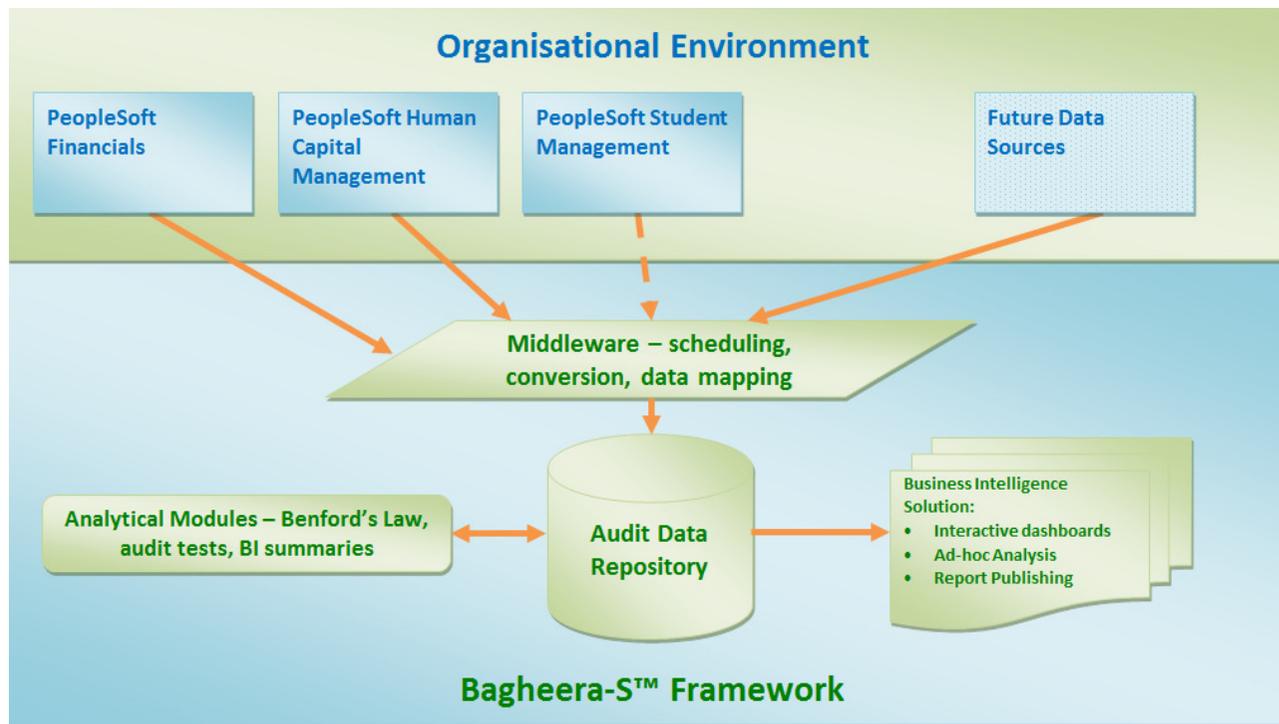

## The Concept

---

- Continuous
- Large amounts of Data
- Integrated Datasets
- Protecting the Source System
- Ease of Use

# The Concept - Continued

## The Data

---

### (Oh Boy, Getting the Data)

- Virtual machine for internal audit use organised by IT
- Copy of copy of production data
- Finance System Upgrade Project
- HR Patching Project
- Changing data table structures
- Getting attention from busy IT and Finance staff

## The Data

---

**(Oh Boy, Getting the Data)**

## The Lessons

---

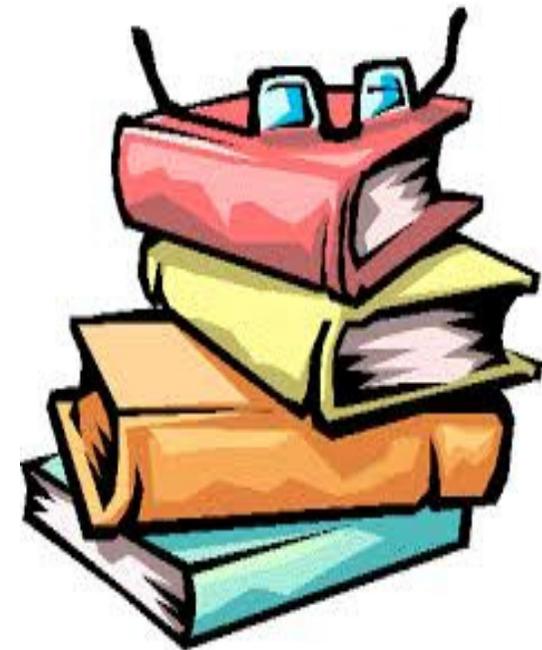

- Overestimate time to complete the project/get the data
- Consider the lifecycle costs – support, licensing
- Many different parts of IT involved
- Many IT things went completely over CAE's head

## The Lessons

---

- Be mindful of other Projects
  - Finance and HR systems
  - Business Intelligence
- Getting buy in from operational staff who will use the system not easy
- Operational staff will get excited when you show them the results
- Audit Committee will be interested too!!

## Case Studies

---

### Duplicate Vendors

- PeopleSoft duplicate vendor report matches on ABN only
- Match on BSB and bank account
- Large number of possible duplicate vendors
- Remove partner combinations – husband/wife
- Employee vendor and supplier vendor

## Case Studies

---

### Duplicate Vendors

- Lack of data entry protocols
  - Use of acronyms
  - Middle names
  - Asian names
  - Trading names vs company names
  - Nick names
  - Branches
- Duplicate payments & errors in travel advance acquittals
- Many duplicate vendors created

## Case Studies

---

### Duplicate Employees

- Controls in PeopleSoft do not identify errors
- Matching between tax file numbers
- Processing errors
  - Duplicated TFN
  - First & middle name reversed
  - Spelling errors
  - Asian names

## Case Studies

---

### Employee/Vendor Bank Accounts

- No reports between HR/Finance to match between data sets
- Matching between BSB and bank account
- Investigated employment conditions and nature of payments to vendor
- Casual employees paid through accounts payable
  - Avoidance of PAYG by employees
  - Payroll tax obligations
  - Health & safety complications

## The Results

---

- Reports and reconciliations made available to Finance & HR
- CFO Compliance Certificates/Statements
- HR very excited
  - Requested additional reports
  - Push reports out to HR managers & advisors
  - Savings in payroll reconciliation
  - Quicker identification of duplicate employee records
- Finance
  - Requested additional report for contractor reporting
  - Improved vendor management
  - Use of HR leave reports in financial reporting

## The Results

---

For Internal Audit:

- Reporting across a range of internal controls:
  - HR - payroll, leave management, duplicate employees
  - Finance – vendor management, accounts receivable, accounts payable, assets
- Use in operational review of business units
- Financial statement testing
- Follow up sample of transaction for testing/review/follow up with management
- Access to data and reports without relying on IT

## The Savings

---

84

728

120

208

## The Results

---

Training - ad hoc queries, reporting & dashboards

- Internal Audit
- HR
- IT Business Systems Support
- Finance
  - Accounting & Business Services
  - Business Intelligence

# The Future

---

Further development activities:

- Production of annual financial statements
- Further analysis of existing reports, e.g. leave reports
- Production of quarterly financial reports for management
- Exception reports for student fees
  - Refunds
  - Pricing

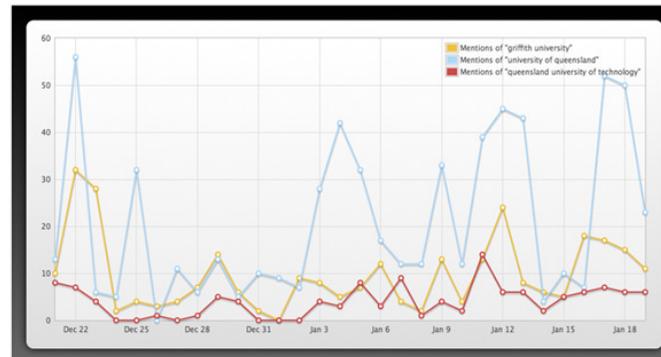

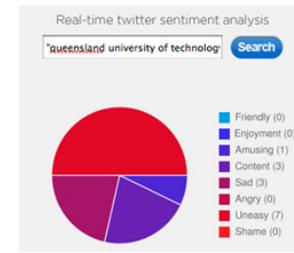

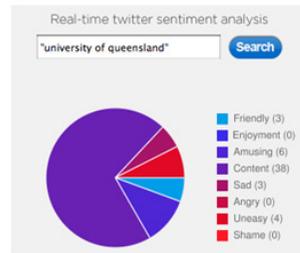

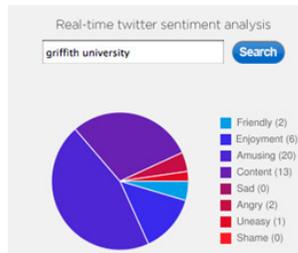

# The Possibilities

- Student Financial Management System
- External Data Sources

## Real Examples of External Source Analytics (Social Analytics for Griffith, UQ and QUT)

## The Conclusion

---

- CMS has created value for IA and our stakeholders
- Clients will need to talk to their IT people to understand what will be needed
- Clients will need to overestimate the time needed to get the data

Questions?
